

# English Language

*"We want to raise our children so that they can take a sense of pleasure in both their own heritage and the diversity of others." Mister Rogers*

## Mission

English is a core subject in the curriculum and it is also an important tool in helping students learn other subjects. Thus, we aim to train students not only to master the four skills proficiently but also on how to use the language effectively and confidently in their daily lives. We hope, through a balanced curriculum with a language-rich environment, experience and exploration, our students can communicate effectively in English inside and outside the classroom.

*"If you talk to a man in a language he understands, that goes to his head.*

*If you talk to him in his own language, that goes to his mind." Nelson Mandela*

## Learning Experience

In order to enrich students' English learning experience, cultural activities including excursions and study tours are organized to widen their exposure. Also, activities such as participating in the Speech Festival, Hong Kong Writing Contest and inter-school debating contests can help to sharpen their English communicative skills. Such experience helps develop the knowledge of the English language which equips students to pursue their work in the future. With our unique school structure of having local and international sections under the same roof, students have the chance to experience different styles of teaching and learning and exchange their ideas confidently in English in such a language-rich environment.
